PROFESSIONAL SUMMARY

AI Engineer, Data Engineer, and Researcher specializing in Generative AI, Machine Learning, MLOps, and Cloud Data Platforms. Experienced in building and deploying production-grade LLM applications, multimodal AI systems, forecasting solutions, and scalable data architectures on Google Cloud and Azure.
Domain expertise in Retail, Marketing, Supply Chain, Manufacturing, Knowledge Management, and Healthcare, delivering AI-driven solutions that enhance operational efficiency and business decision-making.

EDUCATION

National School of Engineering of Sfax (ENIS), Tunisia **January 2026 – Present**
PhD Candidate in Artificial Intelligence
Research Areas: Vision-Language Models (VLMs), Radiology AI, Federated Learning, Agentic AI Systems, Quantum-Inspired Learning, Policy Distillation, Multimodal Learning, Trustworthy and Explainable AI.

National School of Electronics and Telecommunications of Sfax, Tunisia **September 2021 - September 2024**
Engineering Diploma in Computer Science
Relevant Coursework: Machine Learning, Deep Learning, Applied Mathematics, Data Analysis, Database Systems, Cloud Computing , Data Engineering, Computer Vision, NLP, Software Engineering, Algorithms and Data Structures

Preparatory Engineering Institute, Sfax, Tunisia **September 2019 – July 2021**
National Engineering School Entrance Exams Section

WORK EXPERIENCE

OliveSoft **February 2024 – Present**

Data Engineer: Satisfy Running **Mars 2026 – Present**

- Designed and implemented automated **n8n workflows** for extracting, cleaning, and orchestrating data pipelines from **Cegid Orli ERP** to **Google Cloud Storage**.
- Built a multi-layer data architecture including **staging layer**, **data hub**, and **data warehouse** on **BigQuery** to ensure scalable and governed data management.
- Developed robust data ingestion and transformation pipelines to standardize ERP data for analytics, reporting, and downstream consumption.
- Designed and maintained a **semantic data model** enabling **data sharing** across business domains and analytics.
- Delivered interactive dashboards and reporting solutions using **Power BI** to support business KPIs and operational decision-making.
- Collaborated with business stakeholders to align data architecture with reporting needs, governance, and performance objectives.

Tools: Python, n8n, Google Cloud Platform, BigQuery, Cloud Storage, SQL, IAM, ETL/ELT, Data Modeling, Git.

Generative AI Engineer : Internal Commercial Support **Dec 2025 – Present**

- Engaged in **10+ POCs** around Agentic AI and LLM-based solutions addressing commercial and knowledge-driven use cases.
- Translated business requirements into **GenAI solutions**, leveraging LLMs, RAG, and agentic workflows to improve decision-making and automation, reducing manual analysis effort by up to **40%**.
- Designed and developed end-to-end **proofs of concept**, including architecture, implementation, evaluation pipelines, and deployment-ready prototypes.
- Delivered **5+ technical demos** to stakeholders and clients, including documentation, performance analysis, and business impact presentations.
- Contributed to the definition of **GenAI best practices** for prompt engineering, evaluation frameworks, and production readiness of agentic systems.

Tools: LangGraph, LangChain, n8n, Databricks, OpenAI, Gemini, Elasticsearch, Docker, LLM/VLM, Vertex AI, Git.

Generative AI Engineer : Jacquemus **Sep 2025 – Dec 2025**

- Developed an **agent-based enterprise search system** integrated with Confluence, improving internal knowledge retrieval efficiency by **35%**.
- Designed an **agent workflow system** enabling automated Jira task creation via conversational interface, reducing manual ticket creation time by **50%**.
- Built an **LLM evaluation framework** using structured scenarios and **LLM-as-a-Judge**, enabling systematic benchmarking across **multiple agent configurations**.
- Designed and executed **3+ evaluation pipelines** to compare performance across retrieval and reasoning strategies.
- Integrated **Langfuse** for observability, enabling monitoring of latency, cost, and quality metrics for production LLM systems.

Tools: Python, LangChain, LangGraph, OpenAI APIs, Embeddings, Vector Search, Langfuse, FastAPI, Docker, Jira API, Confluence API, Git, CI/CD.

DATA Scientist : MPBS **Mar 2025 – Dec 2025**

- Delivered demand and revenue forecasts on GCP Vertex AI, **improving forecast accuracy by 20%**, reducing stockouts and lost sales.
- Developed product quantity forecasting models, **cutting overstock by 15%** and optimizing inventory planning.
- Conducted R&D on manufacturing data analysis, enhancing model reliability and interpretability .
- Created reliability factors to assess prediction confidence, supporting **strategic production planning**.
- Reduced model training time by **35%** using Optuna hyperparameter optimization and scheduled retraining.
- Automated retraining and CI/CD pipelines via Cloud Build, **reducing operational bottlenecks by 30%**.

Tools: Google Cloud Platform (Cloud Run, BigQuery, Vertex AI Studio, BigQuery, Cloud Build trigger, Workflow), docker, Optuna, Prophet, SARIMAX, Python, Git, Jira, Confluence, . . .

AI Engineer : Kwore **Feb 2024 – Mar 2025**

- Increased social media marketing effectiveness by predicting post popularity and key KPIs **before publication**.
- Led R&D on multimodal data analysis for marketing insights, improving **decision-making by 25%** and reducing manual labeling by **30%** using an LLM-based auto-labeling agent.
- Built a scalable pipeline handling **10K+ posts/week** with GCS ingestion and BigQuery transformations.
- Deployed training pipelines on AzureML with MLflow tracking and automated RESTful API for **model serving**.

Tools: Azure(AzureML Studio), Google Cloud Platform (BigQuery, GCS), Scalway, LLM(Qwen, GPT, DeepSeek), HuggigFace, MLflow, GitHub Actions, PyTorch, langchain, langGraph, docker, Git, Jira, Confluence. . .

CERTIFICATIONS

Google Cloud Certified: Associate Data Practitioner **April 2026**
Microsoft Certified: Azure Data Scientist Associate **November 2025**
Microsoft Certified: Azure AI Fundamentals **November 2023**
Microsoft Certified: Azure Data Fundamentals **November 2023**

SKILLS

ML / AI Development: PyTorch, TensorFlow, Keras, scikit-learn, SciPy, Optuna, OpenCV, Transformers, Diffusers, embeddings, LLMs, RAG, MCP, LangChain, LangGraph, Semantic Kernel, n8n.

Programming Languages: Python, SQL, Java

Cloud & MLOps: Google Cloud Platform(Vertex AI, BigQuery, Cloud Run, Cloud Functions, GCS, IAM, Cloud Build); Azure(Azure ML, Storage, Container Registry, Azure DevOps, IAM/RBAC, Azure openai, Databricks, Azure Synapse), Amazon SageMaker, Git / GitHub, Docker, Kubernetes, Linux, GitHub action

Business Domains: Retail, Fashion, Marketing Analytics, Digital Advertising, Supply Chain, Manufacturing, Healthcare, Medical Imaging, Knowledge Management, Enterprise Search, Sales Analytics.

Project Management: Scrum, Jira, Confluence, Azure DevOps

Languages: Arabic (Native), French (C1), English (B2), German (A1)
